Testimony on Emergency Stormwater Regulations  
Position: Against

The Anacostia Watershed Citizens Advisory Committee exists to provide citizen input into the multi-jurisdictional effort to restore the Anacostia River. This effort is known as the Anacostia Watershed Restoration Partnership (<http://www.anacostia.net>) and is coordinated by the Metropolitan Washington Council of Governments.

On April 19<sup>th</sup>, the Partnership is scheduled to release an Anacostia Restoration Plan which includes numerous policy recommendations which are necessary to be followed for the Anacostia River to be restored. The Plan directly states, “The Maryland Stormwater Act of 2007 focus on using smaller ESD practices, which in many cases are practicable as a means of retrofitting to tight spaces, is very significant for the Anacostia.” Uncontrolled stormwater from Maryland has done massive damage to Anacostia Watershed streams, resulting in spiralling costs to the State. Unless the Maryland begins strict control of stormwater volume as soon as possible, the damage and costs to the State will continue to increase. These emergency regulations will delay efforts to restore the Anacostia. Please vote against them so that the Maryland Stormwater Act of 2007 can be implemented on the timetable originally envisioned. Thank you for your consideration.

Mr. Mike Smith, 2009 - 2010 AWCAC Chair  
c/o Metropolitan Washington Council of Governments  
777 North Capitol Street, NE, Suite 300
